

# William Austin Infant School Principle and Visions.

Our Science Principle:

Our mission is to create a learning environment '**Where All Individuals Shine**'. Through our curriculum we aim to nurture and develop children into confident scientists who take risks and self-reflect who can then understand the role Science has in the world around them.

Our Science Visions:

Enjoy the experiences.

Observe and make predictions about investigations.

Choose how to investigate and enquire.

Have access to good quality resources.

Explore and answer their own questions.

Be surprised by the outcome and want to find out why.
